*All equipment is offered subject to prior sale or disposition and written confirmation by Acme Surplus Machinery prior to acceptance of offer.  
All sales subject to Acme's terms & conditions. You may request a copy of these terms and conditions.*

- Equipped with a Palletomatt, which permits continuous automatic operation. The finished skid is removed and the new skid is positioned to receive sheets without operator intervention.
- The 8 position unwind stand is designed as a turntable. The unit has 4 rolls stands on each side and is rotated after the first set of rolls has been consumed.
- The two decurlers have different diameter decurler bars. One size bar is used for paper grades, while the second is used for board grades.
- Includes roll diameter sensor, allowing the unwind to automatically stop leaving a tail for splicing on the next roll.
- Includes automatic splice detection.
- Maintenance and operational diagnostic system.
- Includes 3 Jagenberg Tru-Slit slitters for trimming and slitting and/or splitting.
- Capable of sheeting lightweight papers or heavy weight board with excellent quality.
- The sheerer is completely automatic, requiring roll changes, only after four rolls.
- Automatic length and squarness settings.
- Includes drag link gearing that extends knife life and provides a better cut for heavy weight grades.
- Electronics upgrade in 2009
